

TRAFFIC CONTROL EQUIPMENT

To Whom It May Concern:

I have known and worked with Tony Saucedo for over 15 years. Tony has been one of the support personnel at Siemens ITS and has assisted us in installing, troubleshooting and maintaining various traffic control systems. In many cases Tony was able to assist even when the problem was not related to the product(s) Siemens sold.

Tony is organized, efficient, extremely competent, and has an excellent rapport with my staff. His communication skills, both written and verbal, are excellent.

In summary, I highly recommend Tony to provide technical assistance for your company as he will be a valuable asset for any organization.

Yours Truly
TACEL LTD.
